

I've contacted Bill Wohl to assist us with an anti-slip solution for the spa wet areas.

From the initial contact, Bill proved to be a source of very valuable and timely information.

The preliminary assessment of the area was done at the time we had specifically requested and the actual product application was very quick and efficiently done, without disrupting the spa operation.

It had made a big difference in terms of guest experience and their safety when using the wet areas.

Bill was a pleasure to deal with, extremely professional, reliable and helpful.

I would certainly recommend him to anyone interested in finding a solution for their spa
