To Whom It May Concern;

We recently worked with Kris from Solutions, LLC and were quite pleased with the result. He came out to the property first to give us an interactive demo. The product was exactly what we needed in our pool area as the pool surround is entirely ceramic tile. While 'caution; wet floor' signs are nice to have, a non-slippery floor is even better! The product was applied quickly during hours that were convenient to us. THAT is service! Again, I cannot stress how pleasant the business interaction was with Kris and the company. I strongly recommend their services to anyone!

Sincerely,

Sara
